

Java Angular Developer

Lux-Advisory is a company specialized in IT project management. Our consultants take part in European or International projects. To support the increase of our activities, we are currently looking for a **Java Angular Developer**.

Services

- Work with the subject matter experts to gather business requirements and any other relevant input
- Perform analysis of existing solutions and additional/new end user requirements
- Design applications and micro-services addressing these requirements
- Implement automated test cases (unit tests, acceptance tests)
- Support existing microservices applications for different divisions
- Test (unit test, integration test, system test, performance test) applications and micro-services
- Support the business users during user acceptance testing and obtain business sign-off
- Provide documentation, reporting, and change management
- Identify risks and liaise on issues related to changes
- Act as a change agent to help facilitate effective deployments/modifications to new and current industry practices
- Maintain customer relationships within different divisions to ensure smooth communication
- Support and operate required development tools as well as the developed applications themselves

Skills

- Bachelor's degree in Information Technology, or equivalent experience
- Minimum of 5 years' development and rollout experience with Java in a professional environment
- Experience with automatic testing, e.g., JUnit, Cucumber
- Experience with Spring, Spring Boot, JPA, and Hibernate is an asset
- Solid experience with Angular or comparable web framework
- Experience with HTML and ECMAScript (JavaScript) is an asset
- Experience with continuous integration and continues delivery pipelines, e.g., Jenkins
- Experience with document oriented database solutions, e.g., MongoDB or CouchDB
- Good experience in agile software development, preferably Scrum
- Experience in DevOps is an asset
- Experience in estimating, forecasting, actuals tracking, project reporting
- Excellent French communication skills, both oral and written.
