

Full stack Developer

Lux-Advisory is a company specialized in project management and business analysis. Our consultants take part in European or International projects. To support the increase of our activity, we are currently looking for a **Full Stack Developer**.

Mission

- Design, develop and test a large-scale, custom distributed software system using latest Java and JavaScript technologies
- Employ agile development practices including test and deployment automation as well as Continuous Integration/Continuous Delivery using Jenkins to improve overall execution speed and product quality
- Function as in-house consultant/expert for resolution of complex technical issues. Research emerging trends/best practices and determine implications of proposed solutions on meeting business unit strategy
- Be a technology advocate and share expertise with other team members
- Be a key partner to the business and the rest of the team throughout the delivery cycle
- Think through challenging and interesting problems and solve them with your team
- Coach and help develop the team and technology community

Profile

The Consultant will have the following profile:

Technical skills:

- Hands-on development and delivery experience (+3 years) using Java and Spring Framework
- Extensive hands-on experience (+5 years) with a client-side rendering framework such as Angular (preferred), Ember, Vue.js or React
- Experience with data streaming technologies like Kafka
- Micro services architecture and platforms as Spring Boot
- Experience in SQL, NoSQL
- Great Object-Oriented coding practices, including strong design patterns knowledge, refactoring, clean code
- Experience in DevOps capabilities E.g. Jenkins, Maven, UrbanCode etc
- Experience in Cloud platforms as Pivotal
- Experience with Elastic Search
- English - must have
- French - nice to have

Soft skills:

- Real passion for software engineering and best practices
- Passion for technology, team leadership and a willingness to mentor and work with developers at all levels of experience
- Experience in Agile, Lean and/or Continuous Delivery approach such as Continuous Integration, TDD, infrastructure as code
